

2nd Report in Computational Physics

James Lee

March 16, 2016

Abstract

This report basically covers nothing.

1 Background

Nice advertisement!

2 Main Contents

I have been using Word(unauthorized) as my text editor ever since I began to use computers. Using vim has truly opened a new world for me. I love its light, elegant texting style. I will try to improve my vim texting skills.
By the way, I decided not to start the sacred war between emacs and vim.

3 Conclusion

Vim is a lot of fun.

4 Acknowledgement

Thanks to Prof.Cai for choosing vim in this course. I am really looking forward to following courses.
